CHEMICO-BIOLOGICAL INTERACTIONS

SUBJECT INDEX

VOLUME 73 (1990)

N-Acyl dehydroalanines, superoxide anion, hydroxyl free radical, lipid peroxidation, spin trapping, free radical scavenger, 77
Ah receptor, 3,3′,4,4′-tetrachlorobiphenyl, metabolites, chick embryos, bile, analysis, toxicity, 121
Alkylation, melphalan, immunoassay, DNA, 183
Allantoin, uric acid, oxidant, hydroxyl radical, hypochlorous acid, 235
Analysis, 3,3′,4,4′-tetrachlorobiphenyl, metabolites, chick embryos, bile, toxicity, *Ah* receptor, 121
Anti-tumour testing, platinum(II) amine complexes, cyclobutanedicarboxylates, leukemia, Yoshida lymphosarcoma, synthesis, characterization, 337
Antiparasitic drugs, free radical damage, parasites, 1
Apurinic sites, 9-NH2-ellipticine, AP endonuclease, intercalating dimers, 249
AP endonuclease, 9-NH2-ellipticine, apurinic sites, intercalating dimers, 249
Arachidonic acid, membrane potential, superoxide anion, leukocyte, neutrophil, 309
Autoxidation, superoxide dismutase, DT-diaphorase, NADPH-cytochrome *P*-450 reductase, naphthosemiquinones, 53

Bile, 3,3′,4,4′-tetrachlorobiphenyl, metabolites, chick embryos, analysis, toxicity, *Ah* receptor, 121
Bleomycin, metallodrugs, metals, oxidative stress, DNA damage, dioxygen, 133

Ca^{2+}-ATPase, CCl_4, lipid peroxidation, plasma membranes, 4-hydroxy-nonenal, 103
CC-1065, PDE-I_s and $CDPI_s$ cytotoxic activity, DNA minor groove binding properties, 29
CCl_4, Ca^{2+}-ATPase, lipid peroxidation, plasma membranes, 4-hydroxy-nonenal, 103
Characterization, platinum(II) amine complexes, cyclobutanedicarboxylates, anti-tumour testing, leukemia, Yoshida lymphosarcoma, synthesis, 337
Chick embryos, 3,3′,4,4′-tetrachlorobiphenyl, metabolites, bile, analysis, toxicity, *Ah* receptor, 121
Chloroethylene oxide, nucleophilic selectivity, 4-(*p*-Nitrobenzyl)pyridine assay, proton nuclear magnetic resonance spectroscopy, reaction kinetics, 261
Cisplatin, S1 nuclease, DNA damage, 195
Cyclobutanedicarboxylates, platinum(II) amine complexes, anti-tumour testing, leukemia, Yoshida lymphosarcoma, synthesis, characterization, 337
Cytochrome *P*-450, macrolide antibiotics, drug interaction, *P*-450 $IIIA_1$, 297

Dioxygen, bleomycin, metallodrugs, metals, oxidative stress, DNA damage, 133
DNA, melphalan, immunoassay, alkylation, 183
DNA damage, bleomycin, metallodrugs, metals, oxidative stress, dioxygen, 133
DNA damage, S1 nuclease, cisplatin, 195
DNA minor groove binding properties, CC-1065, PDE-I_s and $CDPI_s$ cytotoxic activity, 29
Dolichol-cholesterol, ubiquinone, lipid biosynthesis, microsomes mitochondria, lysosomes, 221
Drug interaction, macrolide antibiotics, cytochrome *P*-450, *P*-450 $IIIA_1$, 297
DT-diaphorase, superoxide dismutase, NADPH-cytochrome *P*-450 reductase, autoxidation, naphthosemiquinones, 53

Flavonoids, human neutrophils, luminol-dependent chemiluminescence, 323
Free radical damage, antiparasitic drugs, parasites, 1

Free radical scavenger, superoxide anion, hydroxyl free radical, lipid peroxidation, spin trapping, *N*-acyl dehydroalanines, 77

Gene expression, MNNG, tyrosine aminotransferase, hepatoma cells, steroids, 207
Glutathione conjugation, trichloroethene, nephrotoxicity, nephrocarcinogenicity, 89

Hepatoma cells, MNNG, tyrosine aminotransferase, gene expression, steroids, 207
Human neutrophils, flavonoids, luminol-dependent chemiluminescence, 323
4-Hydroxy-nonenal, CCl_4, Ca^{2+}-ATPase, lipid peroxidation, plasma membranes, 103
Hydroxyl free radical, superoxide anion, lipid peroxidation, spin trapping, *N*-acyl dehydroalanines, free radical scavenger, 77
Hydroxyl radical, uric acid, oxidant, hypochlorous acid, allantoin, 235
Hypochlorous acid, uric acid, oxidant, hydroxyl radical, allantoin, 235

Immunoassay, melphalan, DNA, alkylation, 183
Intercalating dimers, 9-NH2-ellipticine, apurinic sites, AP endonuclease, 249

Leukemia, platinum(II) amine complexes, cyclobutanedicarboxylates, anti-tumour testing, Yoshida lymphosarcoma, synthesis, characterization, 337
Leukocyte, arachidonic acid, membrane potential, superoxide anion, neutrophil, 309
Lipid biosynthesis, ubiquinone, dolichol-cholesterol, microsomes mitochondria, lysosomes, 221
Lipid peroxidation, CCl_4, Ca^{2+}-ATPase, plasma membranes, 4-hydroxy-nonenal, 103
Lipid peroxidation, superoxide anion, hydroxyl free radical, spin trapping, *N*-acyl dehydroalanines, free radical scavenger, 77
Luminol-dependent chemiluminescence, flavonoids, human neutrophils, 323
Lysosomes, ubiquinone, dolichol-cholesterol, lipid biosynthesis, microsomes mitochondria, 221

Macrolide antibiotics, drug interaction, cytochrome *P*-450, *P*-450 $IIIA_1$, 297
Melphalan, immunoassay, DNA, alkylation, 183
Membrane potential, arachidonic acid, superoxide anion, leukocyte, neutrophil, 309
Metabolites, 3,3',4,4'-tetrachlorobiphenyl, chick embryos, bile, analysis, toxicity, *Ah* receptor, 121
Metallodrugs, metals, bleomycin, oxidative stress, DNA damage, dioxygen, 133
Metals, bleomycin, metallodrugs, oxidative stress, DNA damage, dioxygen, 133
Methimazole, myeloperoxidase, thiyl radicals, 279
Microsomes mitochondria, ubiquinone, dolichol-cholesterol, lipid biosynthesis, lysosomes, 221
MNNG, tyrosine aminotransferase, hepatoma cells, gene expression, steroids, 207
Myeloperoxidase, methimazole, thiyl radicals, 279

NADPH-cytochrome *P*-450 reductase, superoxide dismutase, DT-diaphorase, autoxidation, naphthosemiquinones, 53
Naphthosemiquinones, superoxide dismutase, DT-diaphorase, NADPH-cytochrome *P*-450 reductase, autoxidation, 53
Nephrocarcinogenicity, trichloroethene, nephrotoxicity, glutathione conjugation, 89
Nephrotoxicity, trichloroethene, nephrocarcinogenicity, glutathione conjugation, 89
Neutrophil, arachidonic acid, membrane potential, superoxide anion, leukocyte, 309
9-NH2-ellipticine, apurinic sites, AP endonuclease, intercalating dimers, 249
4-(*p*-Nitrobenzyl)pyridine assay, chloroethylene oxide, nucleophilic selectivity, proton nuclear magnetic resonance spectroscopy, reaction kinetics, 261
Nucleophilic selectivity, chloroethylene oxide, 4-(*p*-nitrobenzyl)pyridine assay, proton nuclear magnetic resonance spectroscopy, reaction kinetics, 261

Oxidant, uric acid, hydroxyl radical, hypochlorous acid, allantoin, 235
Oxidative stress, bleomycin, metallodrugs, metals, DNA damage, dioxygen, 133

P-450 $IIIA_1$, macrolide antibiotics, drug interaction, cytochrome *P*-450, 297

Parasites, antiparasitic drugs, free radical damage, 1
PDE-I_s and $CDPI_s$ cytotoxic activity, CC-1065, DNA minor groove binding properties, 29
Plasma membranes, CCl_4, Ca^{2+}-ATPase, lipid peroxidation, 4-hydroxy-nonenal, 103
Platinum(II) amine complexes, cyclobutanedicarboxylates, anti-tumour testing, leukemia, Yoshida lymphosarcoma, synthesis, characterization, 337
Proton nuclear magnetic resonance spectroscopy, chloroethylene oxide, nucleophilic selectivity, 4-(*p*-nitrobenzyl)pyridine assay, reaction kinetics, 261

Reaction kinetics, chloroethylene oxide, nucleophilic selectivity, 4-(*p*-nitrobenzyl)-pyridine assay, proton nuclear magnetic resonance spectroscopy, 261

S1 nuclease, cisplatin, DNA damage, 195
Spin trapping, superoxide anion, hydroxyl free radical, lipid peroxidation, *N*-acyl dehydroalanines, free radical scavenger, 77
Steroids, MNNG, tyrosine aminotransferase, hepatoma cells, gene expression, 207
Superoxide anion, arachidonic acid, membrane potential, leukocyte, neutrophil, 309
Superoxide anion, hydroxyl free radical, lipid peroxidation, spin trapping, *N*-acyl dehydroalanines, free radical scavenger, 77
Superoxide dismutase, DT-diaphorase, NADPH-cytochrome *P*-450 reductase, autoxidation, naphthosemiquinones, 53
Synthesis, platinum(II) amine complexes, cyclobutanedicarboxylates, anti-tumour testing, leukemia, Yoshida lymphosarcoma, characterization, 337

3,3′,4,4′-Tetrachlorobiphenyl, metabolites, chick embryos, bile, analysis, toxicity, *Ah* receptor, 121
Thiyl radicals, methimazole, myeloperoxidase, 279
Toxicity, 3,3′,4,4′-tetrachlorobiphenyl, metabolites, chick embryos, bile, analysis, *Ah* receptor, 121
Trichloroethene, nephrotoxicity, nephrocarcinogenicity, glutathione conjugation, 89
Tyrosine aminotransferase, MNNG, hepatoma cells, gene expression, steroids, 207

Ubiquinone, dolichol-cholesterol, lipid biosynthesis, microsomes mitochondria, lysosomes, 221
Uric acid, oxidant, hydroxyl radical, hypochlorous acid, allantoin, 235

Yoshida lymphosarcoma, platinum(II) amine complexes, cyclobutanedicarboxylates, anti-tumour testing, leukemia, synthesis, characterization, 337
